

Xometry To Let Customers Offset Carbon Generated by Their Orders

September 24, 2020

On-Demand manufacturing leader invests in minimizing its carbon footprint and that of its customers

GAITHERSBURG, Md., Sept. 24, 2020 /PRNewswire/ -- In a transformational effort to help limit carbon emissions and combat climate change, [Xometry](https://www.xometry.com), the largest global manufacturing marketplace, announced it will provide its customers with an estimate of the carbon footprint of every order and offer the customer carbon credits to offset those emissions.

Xometry has been offsetting carbon from its own operations since February 2020. Each time a package is shipped from Xometry or a Xometry Manufacturing Partner, Xometry works with [Dot Neutral](https://www.dotneutral.com), an organization focused on connecting businesses with carbon emission offset initiatives, to invest in sponsoring a wind farm in Texas, minimizing the carbon footprint from shipping. This industry-leading [program](https://www.xometry.com/carbon) has already offset 1.4 million pounds of carbon since the program's launch, limiting the environmental impact of Xometry's shipped packages.

"It is important for Xometry and its customers to help in the battle against climate change," said Randy Altschuler, Xometry's CEO. "Through our partnership with Dot Neutral, we have already offset enough carbon to charge 83.3 million smartphones. We are excited to grow this program by offering our customers transparency about the total carbon footprint of their orders and give them the opportunity to offset it. We will continue to look for even more ways to improve our environment while transforming custom manufacturing."

Xometry recently raised \$75 million from investors including T. Rowe Price, ArrowMark Partners, and Durable Capital Partners. The company will use a portion of these funds to increase investment in environmental sustainability initiatives.

About Xometry

[Xometry](https://www.xometry.com) is the largest marketplace for custom manufacturing, connecting customers with optimal manufacturing solutions through patented AI technology. Xometry provides on-demand manufacturing, industrial supply materials and financing solutions to a diverse customer base, ranging from startups to small manufacturers to Fortune 100 companies. Our global network of over 5,000 partner manufacturing facilities enables us to maintain consistently fast lead times while offering a broad array of capabilities, including CNC machining, 3D printing, sheet metal fabrication, injection molding, binder jet and urethane casting. Xometry's customers include BMW, Dell Technologies, General Electric, Bosch, and NASA.
